

Lum

Lum Panel 9 Copper

Creating illuminating walls. The Chilean designer, Estefania Johnson, was inspired by Chile's most obtainable raw material, copper. Using basic panels and light panels make it possible to create different design configurations according to the aesthetical and illuminating need of each space. Combine copper with oxidised copper or have one finish throughout, the choice is yours. Installation is easy with metal strips (to be ordered separately) and the standard magnetic mounting system. The wiring also is simple plug and play.
